## HEAT WITHOUT HAZARD

(TO +260°C. — JUST BY MOVING AIR!)

Patented FRICTION-AIRE™ — the unique electric ovens with no heating elements — generates heat to +150°C. (+302°F.), +204°C. (+400°F.) or +260°C. (+500°F.) depending on model just by moving air through a prescribed pattern. Easily, the safest electric ovens ever built — one series of three models U.L. Listed for Class 1, Group D service. Sixteen models in all ranging from 1.3 cu. ft. bench models up to 92 cu. ft. batch ovens.

All feature patented POWER-O-MATIC 90™ Non-Electric Proportioning Control providing exceptional straight-line performance matching the most sophisticated commercial instrumentation. The ideal way to handle gasoline, paints, solvents, explosives and other hazardous materials to critical standards. You can't buy a safer oven — only from Blue M Electric Company; Corporate Headquarters: Blue Island, Illinois 60406.

## JOB-MATCHED MEDIA & LININGS

"tune" mills for profit

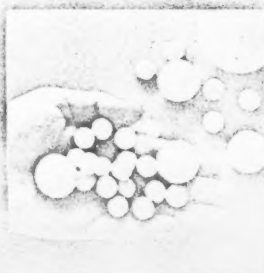

Here's a fact! Ferro offers more options in non-metallic grinding media and linings than anyone.

Altogether 35% alumina... high-density industry standard. Standard-tensile Porox® tough porcelain. And medium-density alumina silicate.

Grinding beads and balls in many sizes. Trough-and-groove mill lining blocks and lifter bars. Grinding rolls and pebbles, too.

Therefore, installations can be "tuned" for more productive mill... shorter cycle time... quick clean-up in color change... minimum heat generation... non-contamination of product.

The leader for over 70 years. Request literature or a call from your Ferro representative, Ferro Lin Plant, Electro Division, Ferro Corporation, East Liverpool, Ohio 43920. (216) 385-1538.
